SUMMARY

Computer Science undergraduate deeply interested in AI, Data, and Machine Learning. Throughout my college years, I've balanced academics and building tech with my passion for sports. I am highly adaptive, always finding my way through complex problems and diverse groups of people, and I listen carefully to build trust through my actions. Most importantly, I am someone who shows up. I believe that while everyone does the work, bringing the same focused mindset and intensity every single day is rare and that is exactly the standard I bring to the table.

EXPERIENCE

Handshake AI

Remote

Software Engineering & AI Training Contributor

Apr 2026 – Jun 2026

- Completed an AI evaluation task focused on identifying failure cases in **LLM-generated coding and reasoning responses**.
- Reviewed responses against provided evaluation criteria and identified **failure cases** involving correctness and reasoning issues.
- Documented and submitted the identified issues through the project evaluation workflow, gaining practical exposure to **AI evaluation and model analysis**.

PROJECTS

FinRecon | *PySpark, Airflow, Docker, MS SQL, Streamlit*

[GitHub](#)

- Architected an end-to-end **Medallion Data Lakehouse** (Bronze/Silver/Gold) using **PySpark** to ingest, cleanse, and execute complex joins on thousands of financial records, identifying monetary variances.
- Orchestrated automated ETL workflows using **Apache Airflow**, implementing robust data quality circuit-breakers to quarantine corrupt records and ensure high-fidelity data lineage.
- Containerized the entire infrastructure with **Docker Compose**, integrating **Microsoft SQL Server** and building an interactive **Streamlit frontend** for live executive KPI reporting.

RagQA | *Python, RAG, Gemini API, Pinecone, Vector Embeddings*

[GitHub](#)

- Built a **Document Question-Answering** application using **Google Gemini** and **Pinecone**, enabling interactive, document-grounded conversations.
- Developed a retrieval pipeline to **parse, chunk, and generate vector embeddings** for efficient **semantic search**.
- Implemented a **Retrieval-Augmented Generation (RAG)** workflow with **source citations** and context-aware responses from relevant document passages.

EpiPredict | *Python, Pandas, NumPy, Scikit-learn, ARIMA, Random Forest*

[GitHub](#)

- Built and evaluated **Regression, ARIMA, and Random Forest** models for **time-series forecasting** to predict influenza trends.
- Engineered **lag features** and rolling averages, and compared forecasting approaches using **RMSE** for model evaluation.
- Developed forecasting workflows and analytical visualizations to support **predictive monitoring** and trend analysis.

EDUCATION

Galgotias University

Bachelor of Technology in Computer Science & Engineering | CGPA : 7.71

Greater Noida, India

Nov 2022 – July 2026

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy, MySQL, Microsoft SQL Server

Data Engineering: PySpark, Apache Airflow, ETL Pipelines, Medallion Architecture

Statistics & Machine Learning: EDA, Feature Engineering, Hypothesis & A/B Testing, PCA, Classification, Regression, Random Forest, SVM, Hyperparameter Tuning, Scikit-learn

Deep Learning & NLP: ANN, CNN, RNN, LSTM, GRU, NLP, Text Classification, Encoder-Decoder, Attention Mechanism

Artificial Intelligence: RAG, LLMs, Embeddings, Semantic Search, Context-Aware Learning

Visualization & Tools: Matplotlib, Git, Docker, FastAPI, Streamlit, AWS

ACHIEVEMENTS

IBM Data Analyst Professional Certificate — Coursera

[Certificate](#)

Deloitte Data Analytics Job Simulation — Forage

[Certificate](#)

Data Analytics with Python and Power BI — AICTE

[Certificate](#)

Leadership & Activities: Humanity Saviors Society Member; College Cricket Team, Opening Batter

School Badminton Champion: Won the **Inter-School Badminton Championship**
