SUMMARY

Final-year Computer Science undergraduate skilled in Python, SQL, and Power BI, with hands-on experience in data cleaning, exploratory data analysis, and dashboard development. Experienced in analyzing datasets to derive actionable insights and support data-driven decision-making through projects in time-series forecasting and fraud detection. Strong analytical and problem-solving skills with an interest in consulting environments.

SKILLS

- **Programming Languages:** Python(Pandas, NumPy)
- **Data Analysis & Visualization:** Matplotlib, Seaborn, Excel, Power BI
- **Databases:** SQL(MySQL, Microsoft SQL Server, SQLite)
- **Techniques:** Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, ETL, Feature Engineering
- **Coursework:** Object-Oriented Programming (OOP), DBMS, Computer Networks, Operating Systems
- **Tools & Platforms:** Jupyter Notebook, Google Colab, Git, GitHub, VS Code

INTERNSHIPS

Data Analytics with Python & Power BI | AICTE EduSkills **Virtual Internship | Jan 2026 – Mar 2026**

- Worked on data analytics tasks using Python as part of a 10-week AICTE-backed program
- Developed interactive Power BI dashboards to visualize business metrics, improving insight accessibility
- Applied Pandas, NumPy & Matplotlib for data cleaning and transformation, enhancing analysis efficiency
- Performed exploratory data analysis (EDA) to identify trends and support data-driven insights

PROJECTS

EpiPredict – Influenza Forecasting using Time-Series Models **Jan 2026 - Feb 2026**

- Built and evaluated Regression, ARIMA, and Random Forest models for time-series forecasting to predict influenza trends
- Performed data preprocessing and basic feature engineering (lag features, rolling averages) to improve model input quality
- Evaluated models using RMSE and compared performance across different approaches
- Visualized trends and model outputs using Python libraries to derive actionable insights

IPLytics – IPL Data Analytics & Visualization Platform **Oct 2025 - Nov 2025**

- Processed and engineered 1,188+ IPL match records to enable structured data analysis
- Calculated key performance metrics such as strike rate, economy, and win percentages
- Analyzed scoring trends and team performance patterns across multiple IPL seasons
- Derived actionable insights from data to identify high-performing players and match-winning patterns

UPIPulse – UPI Transaction Analysis & Fraud Detection System **Aug 2025 - Sept 2025**

- Analyzed UPI transaction datasets to identify usage patterns and transaction trends
- Implemented a rule-based fraud detection approach to flag high-risk transactions using risk scoring
- Streamlined data processing using Python scripts to reduce manual effort in reporting and analysis
- Developed visualizations to uncover transaction patterns and support risk analysis

EDUCATION

GALGOTIAS UNIVERSITY **India**
Bachelor of Technology - Computer Science and Engineering:(CGPA: 7.7 / 10) **Sept 2022 – Present**

CERTIFICATIONS

IBM Data Analyst Professional Certificate | Coursera **Aug 2025**
Deloitte Data Analytics Job Simulation | Forage **Jan 2026**
Data Analytics with Python and Power BI | AICTE **Mar 2026**

OTHER EXPERIENCE

Member | Humanity Saviors Society **2022 – 2023**

- Collaborated with volunteers to organize social welfare activities.
- Actively contributed to on-ground activities, engaging with communities and supporting outreach efforts
